

Scintica and Especialidades Médicas Myr, S.L. announce exclusive partnership for the distribution of its Electromedical Instruments for Anatomical Pathology

[January 24, 2022] Scintica is excited to announce its exclusive distribution agreement for Canada with Especialidades Médicas Myr, S.L., developer, and manufacturer of electromedical instruments for anatomical pathology.

Myr has over 30 years of experience in developing and manufacturing reliable instruments for anatomical pathology, offering a broad and reliable range of equipment for histology, processing, embedding, cutting, and staining of tissues. Many laboratories around the world are already benefitting from these proven technologies.

Blair Poetschke, President of Scintica, says, "We are looking forward to introducing the Myr products to Canada. These have an excellent track record amongst scientists in other parts of the world and can provide significant value to medical research in Canada as well.

Àngels Martínez, International Sales Manager, says, "We are very excited to introduce the Myr equipment's to Canada and confident that Scintica, thanks to their past experience in anatomical pathology and their strive for excellence, is the best option to represent ourselves."

About Scintica:

Scintica is a value-added reseller of advanced preclinical research instrumentation with locations in Canada, the USA, and Europe. Scintica carries a diverse but synergistic portfolio of products, encouraging a holistic approach to science, ranging from imaging systems to laboratory tools and equipment for both *in vitro* and *in vivo* studies. monitoring.
